MAGAZINE BATTERY SAFETY TECHNOLOGY

The first NCM battery that causes 0 fire in nail penetration test to guarantee battery safety.

Achieve high safety through heat-resistance cell, thermal insulation layer, 3D cooling system, BMS

3D COOLING SYSTEM

Smoke exhaust, heat dissipation, liquid cooling
Heat exchange area is increased by 40%
Heat exchange efficiency is increased by 30%

430KM WLTP LONG RANGE*

The battery cell adopts a novel type of square shell battery, boasting a substantial capacity battery pack. A three-in-one highly integrated electric drive system and a battery temperature control mechanism, thereby delivering unparalleled performance.
